

2019 YAMAHA MOTOR FINANCE AUSTRALIAN SUPERBIKE CHAMPIONSHIP
ROUND 3 – THE BEND MOTORSPORTS PARK
TIMING BULLETIN

Intermediate sector timing

3 intermediate points will be used again to create 4 timing sectors, plus a speed trap just after pit exit (as per last year). The split times and speed will be shown on the Race Display screen, the Computime internet-based timing application, and in printed reports. Refer to the map below for approximate locations:

Timing transponder collection and deposits

Transponders will be available for collection from the Welcome Centre on THURSDAY morning from 8:00am. As usual, a \$50 refundable security deposit is required, which can be left in cash or by recording credit card details. Most competitors have already provided credit card details to be kept as transponder security deposit for all rounds.

Competitors who do not have their own mounting bracket can buy them for **\$10 each** (GST incl). They can then retain the bracket on their bike for future events.

Timing transponder mounting and second bikes

It is the competitor's responsibility to ensure that timing transponders are properly mounted for all sessions (including practices and warm-ups). Competitors found not to have transponders properly mounted, may be black-flagged from the session or have times excluded after the end of the session. Computime's back-up procedures ensure that accurate times are recorded if any competitor is found to have a faulty timing transponder.

Some competitors have already ordered and paid for a second transponder as part of their entry. Other competitors with two machines have the option of renting an additional timing transponder for a \$15 CASH rental cost plus usual security deposit.

Television live timing

Televisions in garages will automatically show Computime's Race Display live timing and CompuTrack track positioning display.

FREE wi-fi for live timing and results

Computime's local intranet site (accessed via a web browser) will be available for competitors with wireless enabled laptop computers, tablets, and smartphones. The local intranet site will be accessible via "The Bend Guest Wifi" network so internet will also be available. The intranet site features:

- All results from the meeting (only minutes after each session is completed) in HTML format (for viewing on your web browser) and PDF (Acrobat) format for you to save and print later.
- A live timing display application (for the session currently in progress).
- Historical results from prior and other relevant information such as lap records and race schedule.
- Additional reports available for download that are not normally photocopied for competitors (intermediate lap times, lap sheets, lap charts, fastest lap sequence and points updated after each race).

Coverage will be concentrated in pit lane, but may extend into the general pit area.

To access the local intranet, connect to the **The Bend Guest Wifi** network and enter **www.localtiming.com** as the web browser address.

Internet based timing

Computime will also be providing live timing via the internet for anyone not in an area to access The Bend Guest Wifi network. Follow the links from **www.computime.com.au**.

Jump start cameras

To ensure consistency and accuracy in the assessment of potential jumped starts, Computime's jump start camera system will be set-up this weekend as usual. This system includes simultaneously recording cameras on each grid row and the start light. Any movement at the time the red light is extinguished will result in the implementation of a penalty.
