

COMPUTIME RACE TIMING SYSTEMS

TRANSPONDER PURCHASE

Computime is offering you the opportunity to purchase your own timing transponder, rather than having to rent one every meeting. Simply charge the transponder and bring it to any event where Mylaps transponders are in use.

Avoid the transponder collection fees, the hassle of returning the transponder at the conclusion of the event, and the bigger hassle of having to freight it somewhere after you have forgotten to return it at the event. And save money in the longer term by avoiding per meeting transponder rental charges and the necessity of leaving a security deposit.

These transponders are used at all road race events in Victoria, New South Wales, and Queensland. At the conclusion of the rental period, the term can be extended (although selecting a longer term at the start will save you more money). Your transponder and subscription can be transferred (sold) to someone else if you stop racing during your subscription period.

<u>Costs are as follows:</u>	<u>Retail (per Mylaps)</u>	<u>Computime special!</u>
Transponder & 1 year subscription	\$180	\$160
Transponder & 2 year subscription (SAVE 30% on annual renewal)	\$252	\$225
Transponder & 5 year subscription (SAVE 50% on annual renewal)	\$443	\$395
Transponder with unlimited use	\$600	\$540

Also note that the transponders are covered under full warranty if they become faulty or are damaged (transponder will be fully replaced), and your transponder and subscription can be transferred (sold) to someone else if you stop racing.

Transponders can be mailed to you after payment or held for your collection at the event. Transponders with limited subscriptions need to be activated through the FlexManager program downloadable from the Mylaps web-site. For transponders collected at events, Computime will assist with this process.

Another option for competitors is the outright purchase of a direct powered transmitter. These are permanently wired to the battery of your bike drawing a very small amount of current for power and do not require charging between events. These can be purchased for **\$550**.

To register your interest, please E-mail the following details to sales@computime.com.au – name, contact details (phone or E-mail), number of transponders required, and rental period required, or contact Scott Laing on 0418 171 317 if you have any queries.
